DETAILED ACTION

Claim Rejections

This office action is in response to remarks made on 5/25/05. Examiner took notice of applicant's argument made on 5/25/05 but found not persuasive. Applicant's argument on the ground that the references do not disclose a chip scale package cited in claims 1, 13. However, Sugizaki (U.S. Patent No. 6,437,434) discloses the limitations of claims 1, 13: a chip scale package (lines 31-32, Col. 1) comprising a) at least one solder ball pad (external connection terminal 4) and b) a moat 7 around each solder ball pad (See Fig. 2B). Still regarding to claim 13, it is well known in the art that a polymer collar is formed around the solder ball (admitted as prior art by applicants). Dependent claims 2-12, 14, 21-26 (depend directly or indirectly on claims 1, 13) are being anticipated and obvious from the cited references.

For the above reasons, it is believed that the rejections should be sustained. Feature of an invention not found in the claims can be given no patentable weight in distinguishing the claimed invention over the prior art.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 2818

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
